## DESCRIPTION

For any business that uses weight as the basis of buying, stocking or selling commodities or products, getting accurate and timely information from scale data is critical to key business processes.

Avery Weigh-Tronix has a long history of providing precise, reliable and robust weighing equipment and support services to businesses around the globe, with a pedigree in the industry that is second to none.

## TECHNICAL

### Software Framework

MI Payload is a Microsoft® .NET connected application and has been built on the Microsoft .NET framework. Microsoft .NET is software for connecting people, information, systems and devices.

MI Payload utilizes Microsoft SQL 2008 Express.

MI Payload works with 32-bit versions of Microsoft Windows® XP Professional, and both 32-bit and 64-bit versions of Vista (Home Premium, Business and Ultimate editions) and Windows 7 (Home Premium, Professional and Ultimate editions).

### Hardware Minimum Requirements

- › At least 2 GHz Pentium® 4 (or equivalent)
- › 1 GB RAM
- › 2 GB of hard disk space for installation
- › 16-bit or higher color
- › Optimized for 1024 x 768 pixel displays
- › CD-ROM
